

Brighton Product Design Lab

PROTOTYPING

WORKING ALONGSIDE INDUSTRY PROFESSIONALS TO ADD A NEW PERSPECTIVE THROUGH INNOVATIVE SOLUTIONS

WHAT CAN WE MODEL FOR YOU?

- At Brighton Product Lab we have the technology and skills to create both functional and aesthetic prototypes to get your project moving and help you and your customers experience your product.
- We offers a comprehensive service of prototype and model fabrication using our 3d printers, laser-scanners, laser-cutters and workshops
- Our printers can produce full colour, high resolution, tough models that can test the aesthetic and functional properties of prototypes as well as create usable parts, architectural models, parts for moulding, jewellery or simply things you would like to create.
- We can guide you through the process from CAD to finishing your models or just print and deliver your model.

WHO WE ARE

- Brighton Product Design Lab are a team of final year students, industrial practitioners and academic staff from the University of Brighton
- We have expertise in creativity, besides the design process through research, ideation, development and the communication of design projects
- Our aim is to get valuable practice at addressing real world problems by designing and managing projects for industry
- We have access to a range of state of the art equipment and facilities, such as 3D printing to communicate ideas
- All funds raised will supplement our degree show fund so that we can launch our careers in the best way possible.
