Brighton Product Design Lab

COMPUTER AIDED DESIGN

WORKING ALONGSIDE INDUSTRY PROFESSIONALS TO ADD A NEW PERSPECTIVE THROUGH INNOVATIVE SOLUTIONS

HOW CAN CAD BENEFIT YOU?

- Do you want to preview a realistic photo of your design before its production and successively prepare it for manufacture?
- Do you want to present your ideas to possible investors?
- We can work with your designs or ideas to generate computer aided designs ready to manufacture using Solidworks, Rhino and Keyshot software.
- Using advanced rendering software our studio can generate photo realistic images for marketing or any relevant sales material

WHO WE ARE

- Brighton Product Design Lab are a team of final year students, industrial practitioners and academic staff from the University of Brighton
- We have expertise in creativity, besides the design process through research, ideation, development and the communication of design projects
- Our aim is to get valuable practice at addressing real world problems by designing and managing projects for industry
- We have access to a range of state of the art equipment and facilities, such as 3D printing to communicate ideas
- All funds raised will supplement our degree show fund so that we can launch our careers in the best way possible.
